PROFILE

Financial analyst with 4.5+ years at Accenture and Ameriprise Financial delivering **P&L reporting, variance analysis, month-end close, and forecasting** in multinational finance operations. Uses **SQL, Python, and Power BI** to turn large datasets into leadership insights, and builds **AI/LLM-assisted workflows** and reporting tools. M.S. Business Analytics (Financial Technology Analytics, STEM) at WashU Olin, Dec 2026.

FINANCE & ANALYTICS EXPERIENCE

Ameriprise Financial - Senior Financial Advisory Analyst *Gurugram, India*

Jan 2023 – Aug 2025

- Built self-serve **Power BI** dashboards and KPI frameworks adopted org-wide for real-time leadership visibility, saving 1,400+ hours/year.
- Partnered with advisors on 25+ portfolio reviews/week; built an auto-refreshing control dashboard that flagged at-risk deadlines and improved on-time completion 20% YoY, protecting **advisory-fee revenue**.
- Achieved 100% RMD compliance via an exception-monitoring dashboard with automated age-based checks, preventing IRS penalties.
- Recognition:** Ammy Award (2025) for Operational Excellence, selected among 200+ organization members.

Accenture - Premium Accounting Analyst *Noida, India*

Mar 2021 – Dec 2022

- Owned month-end close for 25 of 45 team processes, running **variance analysis, reconciliations, and close packs**; partnered with IT to write **SQL** queries feeding ledger data into **Excel VBA** macros, cutting close turnaround 40% while holding 95% SLA adherence.
- Built **P&L** and reconciliation reporting in Power BI used across audit and remediation; resolved \$250K+ in financial discrepancies and prevented \$200K+ in potential errors through exception-checking rules.
- Authored 30+ close and reporting SOPs and led cross-training, saving \$8,000 annually through less error rework and faster onboarding.
- Served as IT point of contact for a 50+ member team; built a global productivity report tracking per-employee output for managers.
- Recognition:** Best People Award (2021), awarded to the top 5% of Accenture Operations employees.

GRADUATE, STARTUP & RESEARCH EXPERIENCE

Bunge (WashU Olin CEL Practicum) - Student Consultant, Demand Forecasting *St. Louis, MO*

Aug 2026 – Present

- Advise Bunge, a Fortune 500 agribusiness and food-ingredients company, on whether **Nielsen retail sales data** can act as a leading indicator of food manufacturers' demand for its vegetable fats and oils, to sharpen **demand forecasting** and planning.
- Clean and merge Nielsen retail data with Bunge demand data in **SQL** and **Python**, aligning products, categories, and time periods.
- Building a **forecasting model** that turns retail sales signals into projected ingredient demand, using Claude (LLM) to speed up analysis.

Ainstein (AI-learning startup) - Co-Founder & CFO *St. Louis, MO*

Jul 2026 – Present

- Set product direction and commercial strategy; assembled the four-person product, design, and engineering team.
- Built a 36-month **driver-based financial model** with Bear/Base/Bull scenarios covering revenue build, unit economics, P&L, burn, runway, and use of funds to guide **pricing, resource allocation, and fundraising** decisions.

Washington University in St. Louis - Research Assistant & Graduate Teaching Assistant *St. Louis, MO*

Mar 2026 – Present

- Research Assistant, Banking Regulation Study (Aug 2026 – Present):** Building a 1972–1998 district-level panel from digitized Reserve Bank of India Basic Statistical Returns to measure how RBI regulation shifted the geographic allocation of bank deposits, branches, and credit.
- Developed district and state boundary crosswalks to keep 25+ years of district data comparable; cleaned, validated, and explored the panel in **Stata**, and traced RBI circulars and policy history to date regulatory changes for econometric analysis.
- Graduate Teaching Assistant (Aug 2026 – Present):** Hold virtual office hours and grade SQL and Tableau labs and homework, calibrating marking with fellow TAs, for Database Design & SQL, Data Visualization, and Big Data & Cloud Computing.
- Research Assistant, Wells Fargo Advisors CFAR (Mar – Jul 2026):** Standardized finance-faculty databases across ~150 business schools.

B&N Inspection - Data Analyst Intern, Financial Data & Reporting *St. Louis, MO*

Jun 2026 – Aug 2026

- Consolidated 11 years of fragmented inspection data into a single source of truth across client sites, enabling KPI reporting and forecasting.
- Built **AI (Claude LLM) workflows** to classify and geolocate assets from unstructured inspection PDFs, and a VBA-driven Excel intake workbook with cascading validation feeding projection models.

FINANCIAL MODELING & ANALYTICS PROJECTS

- Three-Statement Financial Model (Excel):** Integrated IS/BS/cash-flow model for a capital-intensive data-center business, with revenue built from contracted compute capacity (MW/GW) driving a **capex & depreciation schedule** and debt/financing waterfall, with scenario toggles.
- RetireSim - Monte Carlo Planner:** 5,000-path Monte Carlo projection engine with Guyton-Klinger guardrails and scenario fan charts.
